

Mission Statement

“To provide cleaning services of the highest standards which aim to protect the health and well being of the community, client companies, employees and the environment”.

Implementation

To initiate, implement and maintain a uniformed and cohesive working partnership with each and every client at all times.

To strive for continuous improvement to provide the highest quality and “best value” cleaning services.

To fully integrate quality, health and safety and environmental concerns into our management systems and operational practices to meet clients needs.

To recognise that sound environmental practice is a fundamental aspect of cleaning services, and a key measure for demonstrating effectiveness.

To ensure that our operations pursue best practice in cleaning services including resource conservation, energy efficiency, waste minimisation and recovery and recycling where appropriate.

To adopt the principles of strong business ethics: including concern for the individual, recognition of our common humanity, and respect for human dignity, equality and social rights.

To adopt the principles of sustainable development including concern for meeting social and environmental needs while promoting ethical economic growth and prosperity in adherence to corporate and social responsibility.
